Gators 2 ES107A

The Ecore Athletic Performance Collection of surfaces combine a vulcanized, colorful EPDM wear layer that resists scuffing and marking with a myriad of tailored base layers to create four unique products: Motivate, Rally, Beast & Monster. This surfacing collections' unique combinations of force reduction and energy restitution are designed to deliver tailored performance in strength and conditioning applications.

Ecore Athletic: Stacked

The Stacked family of products represents Ecore's answer to "Can a floor do more in strength and conditioning environments?". Benefitting from our patented itstru technology, Stacked products feature a unique wear layer laminated to a performance rubber backing. The result is a new generation of surfaces that not only provide the basic attributes that every floor should have, but also more.

What does it take to be a floor?

All Ecore products must provide the basic attributes of a floor.

- ✓ Durability
- ✓ Sustainability
- ✓ Ease of Installation
- ✓ Ease of Maintenance
- ✓ Slip Resistance

Can a floor do more?

In addition to those basic attributes, Ecore Athletic Stacked products offer MORE. Harnessing the power of itstru technology, these surfaces provide enhanced force reduction with balanced energy restitution that maximizes safety, ergonomics and acoustics for the athlete in all of us.

Motivate

Tailored for light strength and conditioning, this 7.5mm surface combines an Ecore wear layer with a 5mm base layer. The result: a balanced distribution of force reduction and energy restitution, designed for the shift in fitness from equipment to more functional training.

7.5mm (2.5mm+5mm)

Applications

Cardio

Light Weights

Strength Equipment

Rally

14.5mm (2.5mm+12mm) Rolls
14.5mm (2.5mm+12mm) Interlocking tiles

Tailored for heavy conditioning, this 14.5mm product showcases a dynamic force reduction of 35.40%. This dual durometer system is engineered to absorb the impact force related to aggressive functional training, providing an ergonomically advanced surface that works in concert with the body.

Applications

Cardio

Light Weights

Moderate Weights

Extreme Functional Training

Tracks

Strength Equipment

Functional Training

Beast

Designed for heavy strength training, this 10.5mm system features an angry base layer that maximizes energy restitution. This dual durometer system is engineered to enhance durability in applications dominated by free weight training.

10.5mm (2.5mm+8mm)

Applications

Cardio

Light Weights

Moderate Weights

Extreme Weights

Strength Equipment

Monster

22.5mm (2.5mm+8mm/12mm)

Custom-made for extreme strength and conditioning, this 22.5mm system features a 10.5mm Performance Beast Roll field united to a 12mm ShockPad. The resulting triple durometer system combines the durability and firm footing desired in strength training with the ergonomic demands of aggressive functional training in one surface.

Applications

Cardio

Light Weights

Moderate Weights

Extreme Weights

Strength Equipment

Functional Training

ecore™

Athletic

The Stacked family of products is part of Ecore Athletic, a business unit under Ecore International. Since 1871, Ecore has been transforming reclaimed waste into unique surfaces that make people's lives better. What started with simple cork closures has evolved into a diverse portfolio of products solving complex problems in applications ranging from playgrounds, weight rooms, and turf fields to hospitals, hotels, and retail environments. We are driven everyday by a simple question, "Can a floor do more?" At Ecore, we believe the answer is "YES." We are building

our company and the products we offer based on the simple notion that floors should elevate beyond current expectations. Our energy is focused on the interaction between people and the surface. We engineer performance well beyond industry standards related to acoustics, ergonomics, and safety. Harvesting the unique power from a myriad of waste streams, Ecore creates products that align—substantial force reduction with a balanced amount of energy return to create dynamic surfaces that are catered to the individual and the application.

Players will fall... we will be there to catch them!
Athletes will over train... we will keep them going!
Deadlifts will sound like thunder... we will quiet the noise!
